### YOUNG CHILD PTSD CHECKLIST (YCPC) (Caregiver: English)

For Child under 7 years old.

Below is a list of symptoms that children can have after life-threatening events.

When you think of ALL the life-threatening traumatic events from the first page, circle the number below (0-4) that best describes how often the symptom has bothered you in the LAST 2 WEEKS.

Not at all   Once in a while   2 to 4 times a week/   Malmost always   Everyday		0	0 1 2 3		4					
1.       Does your child have intrusive memories of the trauma? Does s/he bring it up on his/her own?       0       1       2       3       4         2.       Does your child re-enact the trauma in play with dolls or toys? This would be seenes that look just like the trauma. Or does s/he act it out by him/herself or with other kids?       0       1       2       3       4         3.       Is your child having more nightmares since the trauma(s) occurred?       0       1       2       3       4         4.       Does your child act like the traumatic event is happening to him/her again, even when it isn't? This is where a child is acting like they are back in the traumatic event and aren't in touch with reality. This is a pretty obvious thing when it happens.       0       1       2       3       4         5.       Since the trauma(s) has s/he had episodes when s/he seems to freeze? You may have tried to snap him/her out of it but s/he was unresponsive.       0       1       2       3       4         6.       Does s/he get upset when exposed to reminders of the event(s)? For example, a child who was in a car wreck might be nervous when it is raining. Or, a child who saw domestic violence might be nervous when it is raining. Or, a child who saw domestic violence might be nervous when other people argue. Or, a girl who was sexually abused might be nervous when other people alk about what happened, does s/he walk away or change the topic?       0       1       2       3       4         8.       Does your c		Not at all		2 to 4 times a week/		eek/		Ever	yday	
Up on his/her own?   2. Does your child re-enact the trauma in play with dolls or toys? This would be scenes that look just like the trauma. Or does s/he act it out by him/herself or with other kids?   3. Is your child having more nightmares since the trauma(s) occurred?   0			Once in a while	Half the time	Almost always

### YCPC (Caregiver: English) continued

13.	Has your child lost hope for the future? For example, s/he believes will not					
14.	have fun tomorrow, or will never be good at anything.  Since the trauma(s) has your child become more distant and withdrawn	0	1	2	3	4
14.	from family members, relatives, or friends?	U	1	2	3	4
15.	Has s/he had a hard time falling asleep or staying asleep since the	0	1	2	3	4
	trauma(s)?					
16.	Has your child become more irritable, or had outbursts of anger, or	0	1	2	3	4
	developed extreme temper tantrums since the trauma(s)?					
17.	Has your child had more trouble concentrating since the trauma(s)?	0	1	2	3	4
18.	Has s/he been more "on the alert" for bad things to happen? For example,	0	1	2	3	4
	does s/he look around for danger?					
19.	Does your child startle more easily than before the trauma(s)? For example,	0	1	2	3	4
	if there's a loud noise or someone sneaks up behind him/her, does s/he jump					
	or seem startled?					
20.	Has your child become more physically aggressive since the trauma(s)?	0	1	2	3	4
	Like hitting, kicking, biting, or breaking things.					
21.	Has s/he become more clingy to you since the trauma(s)?	0	1	2	3	4
22.	Did night terrors start or get worse after the trauma(s)? Night terrors are	0	1	2	3	4
	different from nightmares: in night terrors a child usually screams in their					
	sleep, they don't wake up, and they don't remember it the next day.					
23.	Since the trauma(s), has your child lost previously acquired skills? For	0	1	2	3	4
	example, lost toilet training? Or, lost language skills? Or, lost motor skills					
	working snaps, buttons, or zippers?					
24.	Since the trauma(s), has your child developed any new fears about things	0	1	2	3	4
	that <u>don't seem related</u> to the trauma(s)? What about going to the bathroom					
	alone? Or, being afraid of the dark?					
	FUNCTIONAL IMPAIRMENT					
	Do the symptoms that you endorsed above get in the way of your child's					
	ability to function in the following areas?					
25.	Do (symptoms) substantially "get in the way" of how s/he gets along with	0	1	2	3	4
	you, interfere in your relationship, or make you feel upset or annoyed?					
26.	Do these (symptoms) "get in the way" of how s/he gets along with brothers	0	1	2	3	4
	or sisters, and make them feel upset or annoyed?					
27.	Do (symptoms) "get in the way" of how s/he gets along with friends at all –	0	1	2	3	4
	at daycare, school, or in your neighborhood?					
28.	Do these (symptoms) "get in the way" with the teacher or the class more	0	1	2	3	4
	than average?					
29.	Do (symptoms) make it harder for you to take him/her out in public than it	0	1	2	3	4
	would be with an average child?					
	Is it harder to go out with your child to places like the grocery store? Or to a					
	restaurant?				_	
30.	Do you think that these behaviors cause your child to feel upset?	0	1	2	3	4
